CARE** lower vs. MB

HOME CARE
prevalence lower vs. MB

MAJORITY OF CARE
decreasing over time

DEFINITIONS

Median household income: Median combined total income after tax of all household members aged 15+ years

Low income: 50% of the median income in Canada adjusted for family size and composition, as a % of households and % of children (17 years and younger)

Housing affordability: Housing is un-affordable when spending 30+ % of total household income on shelter expenses (e.g., electricity, water, municipal services, rent, mortgage, etc.)

Education: % ages 15+ years with no certificate, diploma, or degree

Socioeconomic Factor Index: Reflects socioeconomic status and social determinants of health as a composite score of average household income, % of single parent households, unemployment rate ages 15+ years, and % ages 15+ years with no high school graduation

Unemployment: % ages 15+ years unemployed as a % of the labour force population

Life expectancy: Expected length of life in years based on patterns of mortality

Premature mortality: Number of deaths before the age of 75 years per 1,000 population

Heart attack: Rate of death or hospitalization due to heart attack per 1,000 residents ages 40+ years

Diabetes prevalence: Total % of residents with diagnosed (Type 1 and 2) diabetes (incidence is new diagnoses per 100 person-years)

Total respiratory morbidity: % diagnosed with respiratory disease (asthma, chronic or acute bronchitis, emphysema, or chronic airway obstruction)

Child asthma: % ages 5-19 years diagnosed with asthma

Mood and anxiety disorders: % adults diagnosed with mood or anxiety disorders

Substance use disorders: % 18+ years diagnosed with substance use disorders (alcohol and/or drug dependence)

Pediatric dental extractions: Rate of hospital-based dental surgeries involving extractions for children under 6 years, per 1,000

Inadequate prenatal care: % women with single, live, in-hospital births receiving no or inadequate prenatal care (e.g., regular prenatal visits)

Home care prevalence: Rate per person year for active clients receiving 1 or more home care services. It is unclear whether lower/higher than MB is better/worse; it could reflect the health of a population or availability and access of services

Majority of care: % who received at least 50% of their ambulatory visits from the same physician or nurse practitioner. Continuity is associated with improved satisfaction and better health outcomes
